NOT YOUR AVERAGE PROTOTYPE SHOP
WE USE OUR VAST EXPERIENCE TO TAKE
YOUR PROTOTYPES TO THE NEXT LEVEL

We take pride in creating high quality prototypes and models. We can take standard prototypes and turn them in to vital engineering tools, taking

the headache out of creating complex prototypes. Using direct cast, testing can be performed on a metal or plastic part in a matter of days with great accuracy, precision and functionality.

“ Let us take ‘the headache’ out of YOUR design process. ”

Most of our prototypes are made on a Z-Corp Z-510 printer. In the past the parts produced by these machines held the reputation of being brittle and soft; however, new innovations and processes have led to the development of more durable parts and models.

Peerless Pattern Works has been in business for more than 80 years, creating foundry tooling and equipment that exceed industry standards. We also offer a full service pattern shop, machine shop, plastic tooling, and low production runs.
